7.2 CI/CD Workflow

Developer pushes code

8. OPERATIONAL COMMAND STRUCTURE

8.1 Single-Word Command System

Leveraging the operational philosophy of single-word directives:

Command	Action	Trigger
“Push”	Deploy next queued item to production	CI/CD pipeline
“Pull”	Fetch latest updates / sync data	Data refresh
“Scan”	Run security audit / health check	Monitoring
“Scale”	Increase compute resources	Traffic spike
“Lock”	Enable maintenance mode	Emergency
“Flow”	Activate customer onboarding sequence	New signup
“Bill”	Generate & send invoices	Monthly cycle
“Grow”	Execute marketing campaign	Scheduled push

8.2 Daily Operations Rhythm

06:00	→	“Scan”	→	System health check
08:00	→	“Pull”	→	Sync analytics & metrics
10:00	→	“Flow”	→	Review new signups, trigger onboarding
12:00	→	“Push”	→	Deploy approved updates
14:00	→	“Bill”	→	Invoice generation (if cycle day)
16:00	→	“Grow”	→	Social content, outreach

8.3 Key Metrics Dashboard

Metric	Target	Source
Monthly Recurring Revenue (MRR)	₦500,000+	Paystack/Flutterwave
Active Users (MAU)	1,000+	Netlify Analytics
Conversion Rate (Free → Paid)	5%+	Internal tracking
Store Revenue	₦200,000+/mo	Shopify
